

THERE'S BEAUTY IN THIS BEAST

Good looks. Tough build. The FX Transporter 4500 multi-purpose truck bed is the perfect combination of eye-pleasing form and hard-working function. Whether it's pulling recreational fifth-wheel camper trailers, horse trailers, or motor sports trailers, the FX Transporter carries its own weight. And then some. Aerodynamically designed and perfectly matched to the Chevrolet and GMC 4500 and 5500 truck cabs, the FX Transporter 4500 lends an integrated OEM appearance to your vehicle.

Developed by the inventor of the multi-purpose truck bed, this design has been proven in over 1,000 delivered bodies. Quality is built in, because the Transporter is manufactured by Brand FX Body Company, world leader in the design and fabrication of composite truck bodies. And because it's made of rugged, lightweight, and corrosion-resistant fiberglass, you'll enjoy many years of trouble-free operation and enhanced fuel efficiency.
